MASTER OF COMPANION ANIMAL CLINICAL SCIENCE

The Master of Companion Animal Clinical Science is a continuing education programme for veterinarians who are seeking advanced training and specialisation in companion animal clinical practice.

The Master's programme has refined my ability to determine the most effective methods and treatments for each patient."

- Jacob C. Meyer, DVM,
Master of Companion Animal Clinical Science
(Odontology)

Specialisation tracks

Internal Medicine, Surgery, Cardiology, Neurology, Odontology, Oncology and Ophthalmology

Key benefits

- Hands-on learning in small groups in State of the Art facilities
- Pre-approved courses to support your specialist training
- Faculty of leading national and international researchers and diplomates
